UNIQUE TRANSPORT & LOGISTICS SOLUTIONS

Today Volga-Dnepr unities almost 4,000 cargo professionals across the globe to offer unique transport & logistics solutions.

CHARTER CARGO OPERATIONS

Delivered by Volga-Dnepr Airlines, AirBridgeCargo Airlines, ATRAN Airlines onboard An-124-100/150, IL-76TD-90VD, Boeing 400ERF/8F, 777F and 737-400SF/800BCF

SCHEDULED CARGO OPERATIONS

Delivered by AirBridgeCargo Airlines and ATRAN Airlines onboard Boeing 747, 777 and 737 freighters between Russia, Asia, the Middle East, Europe and North America covering more than 40 destinations worldwide, with all flights operated into international cargo hubs

STRATEGIC PARTNERSHIP

Volga-Dnepr complements its service offers most efficiently through a strategic partnership with EU carriers - CargoLogicAir and CargoLogic Germany, using their network, fleet and expertise to guarantee its customers a wider choice of delivery options through EU carriers' capabilities and Open Skies advantages.

MRO SERVICES

For aircraft produced by the Russian and international OEMs:
Line and Base maintenance
Hangar facilities
Component repair
Engineering support
Aviation Training Center and others

SUPPORTING SERVICES

DIVERSIFIED FLEET TO MEET YOUR REQUIREMENTS

Volga-Dnepr's fleet consists of unique **ramp freighters**, AN-124-100/150 and IL-76TD-90VD and **non-ramp Boeing 747, 777 and Boeing 737 freighters**. While AN-124 and IL-76 are ideal for charter missions without special loading equipment being in place and are self-reliant when it comes to uploading/offloading procedures, B747, 777 and B737 freighters are operated to the airports with more developed cargo infrastructure and are used for palletized cargo.

RAMP FREIGHTERS

AN-124-100/150

Payload: 120,000/150,000 kg

IL-76TD-90VD

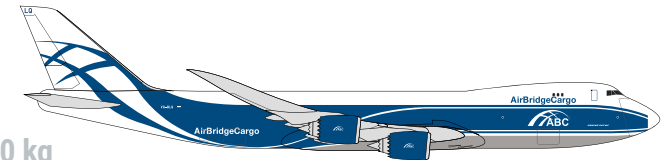

Payload: 50,000 kg

NON-RAMP FREIGHTERS

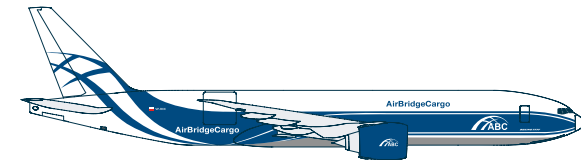

Boeing 747-8F/400ERF

Payload: 139,000/128,500 kg

Boeing 777F

Payload: 102,010 kg

Boeing 737F

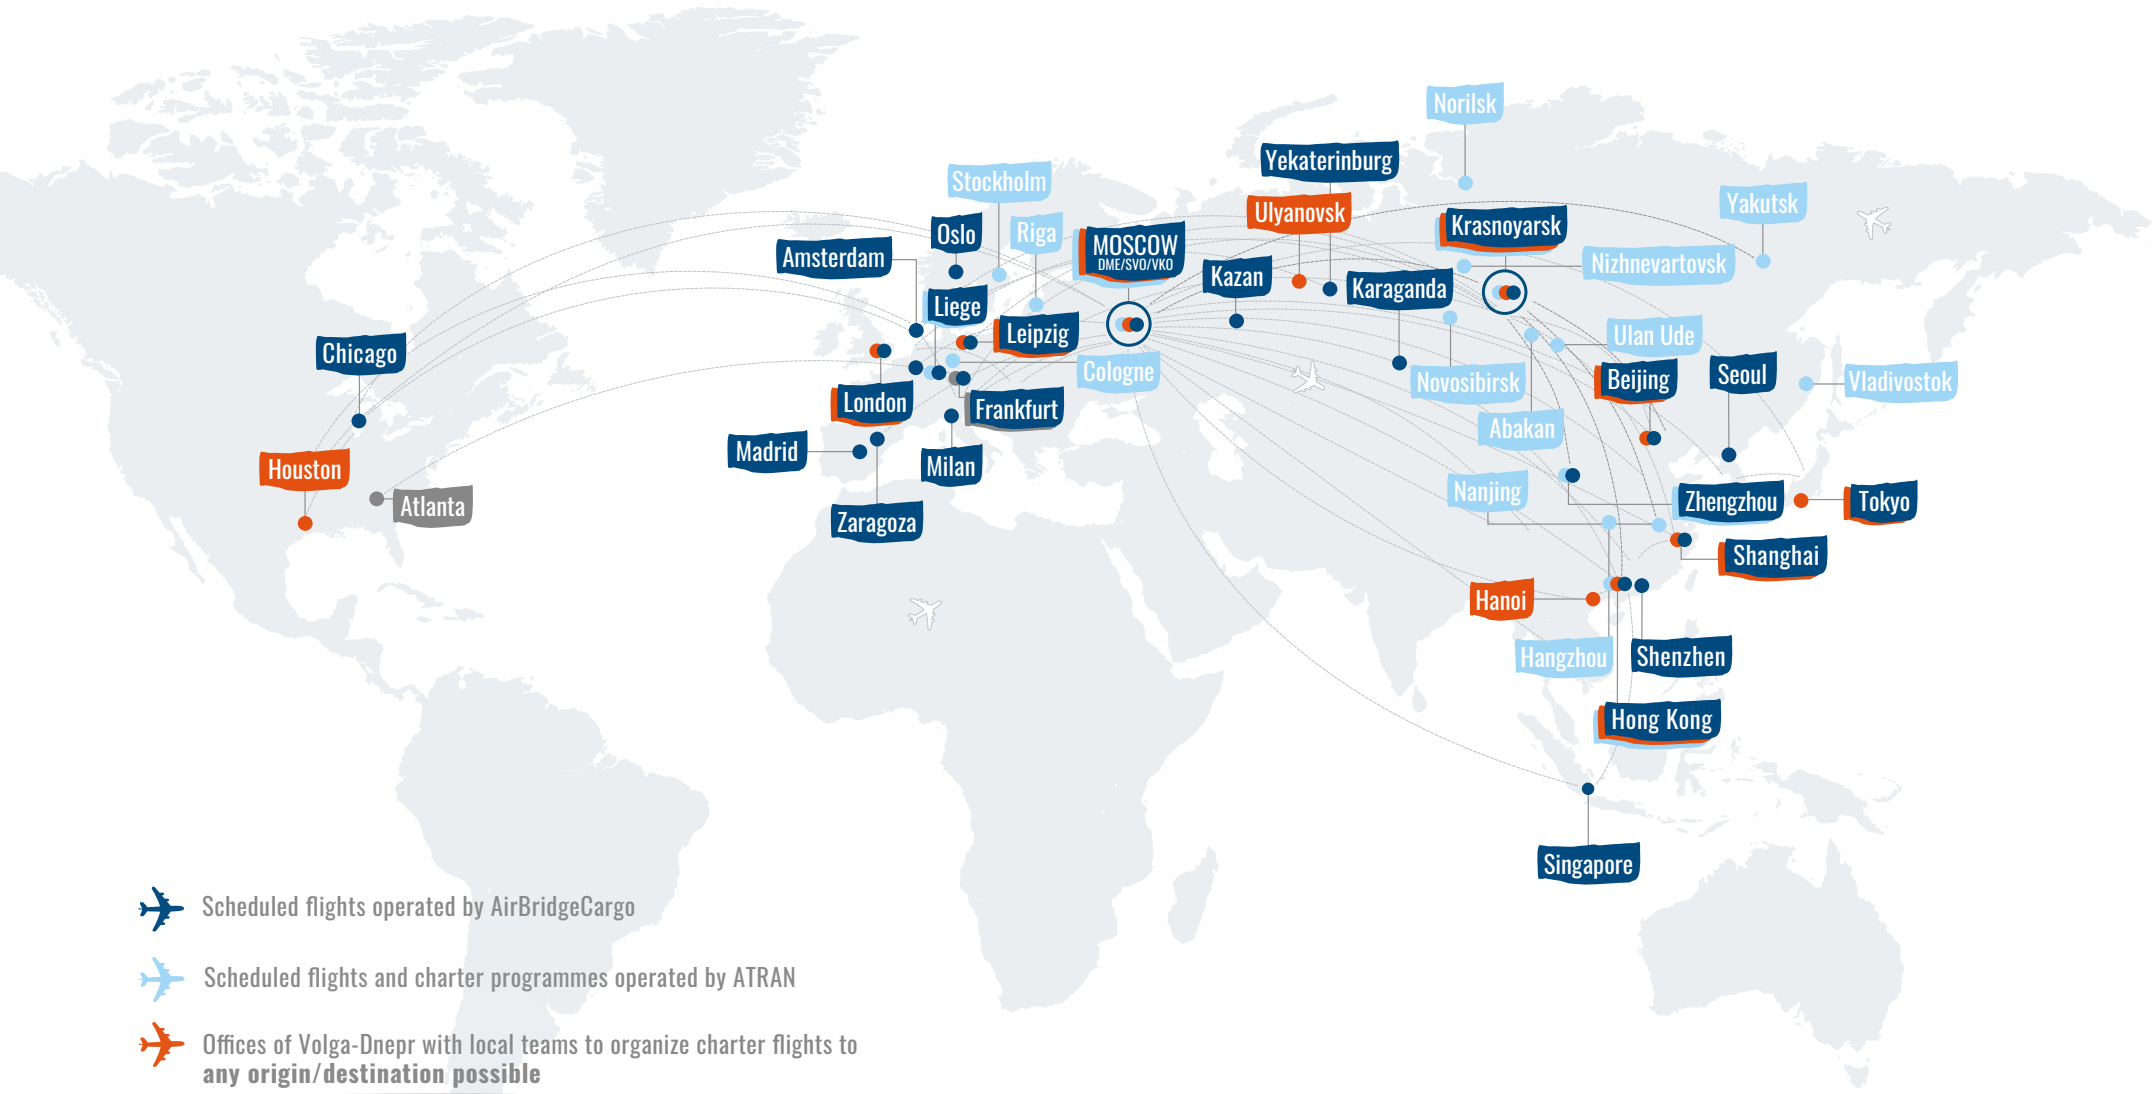

Payload: 23,950 kg

- 10** AN-124-100
- 2** AN-124-150
- 5** IL-76TD-90VD
- 17** Boeing 747F
- 1** Boeing 777F
- 5** Boeing 737F

WE CONNECT THE WORLD *in the most efficient way*

-  Scheduled flights operated by AirBridgeCargo
-  Scheduled flights and charter programmes operated by ATRAN
-  Offices of Volga-Dnepr with local teams to organize charter flights to **any origin/destination possible**
-  Scheduled flights and charter programmes operated by CargoLogicAir, strategic partner

THREE AIRLINES - ONE MISSION

WORLDWIDE REACH and GLOBAL EXPERTISE *with Cargo Supermarket*

Volga-Dnepr has successfully introduced its **Cargo Supermarket** concept which puts into action a 'one-stop-shop' principle. Rather than sending multiple quote enquiries across various carriers, your needs are addressed through **one channel** getting you the most optimal solution in the shortest possible time. **Through Cargo Supermarket our customers receive:**

- > Cost-effective logistics solutions onboard various freighters
- > Access to diversified fleet of An-124-100/150, IL-76TD-90VD, B747F, B777F and B737F
- > Scheduled and charter options to consider
- > Knowledge and expertise of local cargo practitioners with global vision of air cargo market

Volga-Dnepr's cargo practitioners have been developing dedicated industry solutions using their diverse background, expertise and experience for customers from Oil & Gas, aerospace, automotive, humanitarian and other industries.

BEST SOLUTIONS *for every challenge*

AID & RELIEF

Changing the world for a better.

We operate at the forefront of disaster response and have been **among the first** after earthquakes in China, Haiti, India, Nepal and Turkey, tropical storms in the US, Caribbean, Mexico, the Philippines and Vanuatu, and floods and volcanoes in Pakistan and Chile. We were also heavily involved in the major relief effort after the 2004 tsunami in southeast Asia and in helping to suppress the outbreak of Ebola in West Africa.

AEROSPACE

Performing the art of opening horizons.

For more than three decades we have deepened our knowledge in transportation of aerospace equipment, guaranteeing its safe, reliable and speedy delivery to their final destination. Three helicopters onboard An-124-100 from the Falkland Islands to Norway, multimodal transportation of satellite in a special container with the temperature-control system from Canada to Russia, delivery of aircraft parts and fuselages - we have gained a unique level of expertise in the movement of aerospace cargoes and have become the preferred transportation partner to many of the world's leading manufacturers and operators.

HEALTHCARE

We work for a better tomorrow.

From vaccines, PPE, laboratory equipment, MRI/MRT machines to blood samples and beyond. What started as charter humanitarian missions on AN-124-100 and Il-76TD-90VD, soon transformed into regular shipments of much-needed pharmaceutical products with dedicated services onboard Boeing 747 and Boeing 737 freighters to help people live healthier and longer lives. We do not take 'no' as an answer and find logistics solution for each shipment, be it a full charter of special refrigerated containers with vaccines, PPE in the battle against COVID-19 spread or oversized and heavy laboratories.

BEST SOLUTIONS *for every challenge*

OIL & GAS

We fuel the future.

From single flights carrying **oil pumps** from the Netherlands to Turkmenistan or **100 tonnes of pipes** to Brunei, finding a bespoke shipping solution for a 38.4m stripping tower from the US to Iraq, or creating a unique 80-flight 'airbridge' to **safely transport 6,000 tonnes of vital equipment to a new gas conditioning plant** in the highlands of Papua New Guinea, we always create the most optimum solution.

HIGH TECH

Shaping the future today.

Throughout the history of our company, we have witnessed the transformation of high-tech products. While starting with sophisticated and sensitive satellites, aircraft engines and other equipment which we still transport, we have then moved to electronic gadgets which form the high-tech ecosystem of today's modern world. Smartphones, laptops, computers, wearables, household appliances – three decades ago some of these products did not exist and we paved the way towards safe and reliable transportation of this sensitive cargo.

ENERGY

Delivering Energy to the world.

The types of renewable and non-renewable energy and power cargoes we are asked to deliver include **rotors** from Germany to India, **heavy mobile power generators** from France and Dubai to customers in Nigeria and Harare, as well as **unique outsized and heavyweight cargoes, including a 73-tonnes runner** from Austria to Russia, and a series of flights to move **generators** to increase power plant capacity in Madagascar.

BEST SOLUTIONS *for every challenge*

E-COMMERCE

Gearing up your online shopping.

With online shopping becoming a habit rather than a random purchase, air carriers have become the major player in the online delivery process. People can get everything they need with just a few mouse clicks, not knowing 'behind-the-scenes' of this complicated multi-tiered delivery. From consumer and DIY goods to out-of-gauge furniture items and pharmaceutical products (biologically active supplement, non-temperature medicines) – we deliver the world to your house.

AUTOMOTIVE

We drive your business forward.

We've carried **new model vehicles for advertising film shoots**, top of the line **sports cars** for their new owners in Asia, fleets of **limousines** for senior governmental officials, **solar-powered cars, cars and jeeps for the Silk Way Rally** from Turkmenistan to Germany, and **racing cars** for the Macau Grand Prix. We've even delivered the World Land Speed Record holder to and from its record-breaking success in the Black Rock Desert in Nevada, US.

THE PROCESS OF *moving your cargo*

Once we receive your request, the delivery of your cargo is managed through **8 KEY STAGES**:

ASK OUR EXPERTS FOR HELP & ADVICE

Our customer service is available 24/7/365 and we support you on:

- Design stage of your cargo to ensure transportation requirements are incorporated in the manufacturing process to avoid additional costs or delays of your delivery schedule
- Appropriate cargo rigging and mooring sites
- Packaging to sustain all maximum operating conditions inflight
- Air pressure requirements to avoid damage
- Design and manufacturing of frames
- Advice on hazardous goods
- Designs for special shipping containers
- Recommendations on methods of loading and unloading
- Preparation of cargoes to ensure minimal dismantling prior to carriage
- Temperature and pressure requirements in the aircraft's cargo cabin

Our local experts, loading equipment and aircraft positioned at all of our global operations bases enable that the fast, efficient and cost-effective delivery solutions are always close at hand.

A TOTAL LOGISTICS *solution*

Through our **CARGO SUPERMARKET** concept we aim to make life of our customers easier. Our **'ONE-STOP-SHOP'** service improves customer experience, making it seamless, faster and reliable. **Here is how it works within Volga-Dnepr Group:**

CARGO REQUEST

with all the characteristics

- Dimensions
- Type of cargo
- Commodity
- Weight
- Origin
- Destination

CLASSIFICATION OF CARGO

general, temperature, non-temperature, oversized, heavy, dangerous, live animals, etc.

- Cargo quoting
- Route planning, incl. trucking (if needed)
- Minimum list of transportation conditions
- Loading conditions
- Choice of aircraft
- Calculation of costs
- Packaging requirements

SCHEDULED CARGO OPERATION

- Route is within scheduled carriers' network
- Payload starting from 0.5 - 1 kg
- Additional equipment of ULD for transportation of specialty cargo (temperature sensitive, dangerous goods, etc)

LOGISTICS CONSULTING

- Door-to-Door delivery
- Working out of cargo routing, its verification and assessment - from production site to final destination
- Combined worldwide multimodal schemes using road, rail and sea transport modes
- Cargo insurance and storage

ENGINEERING CONSULTING

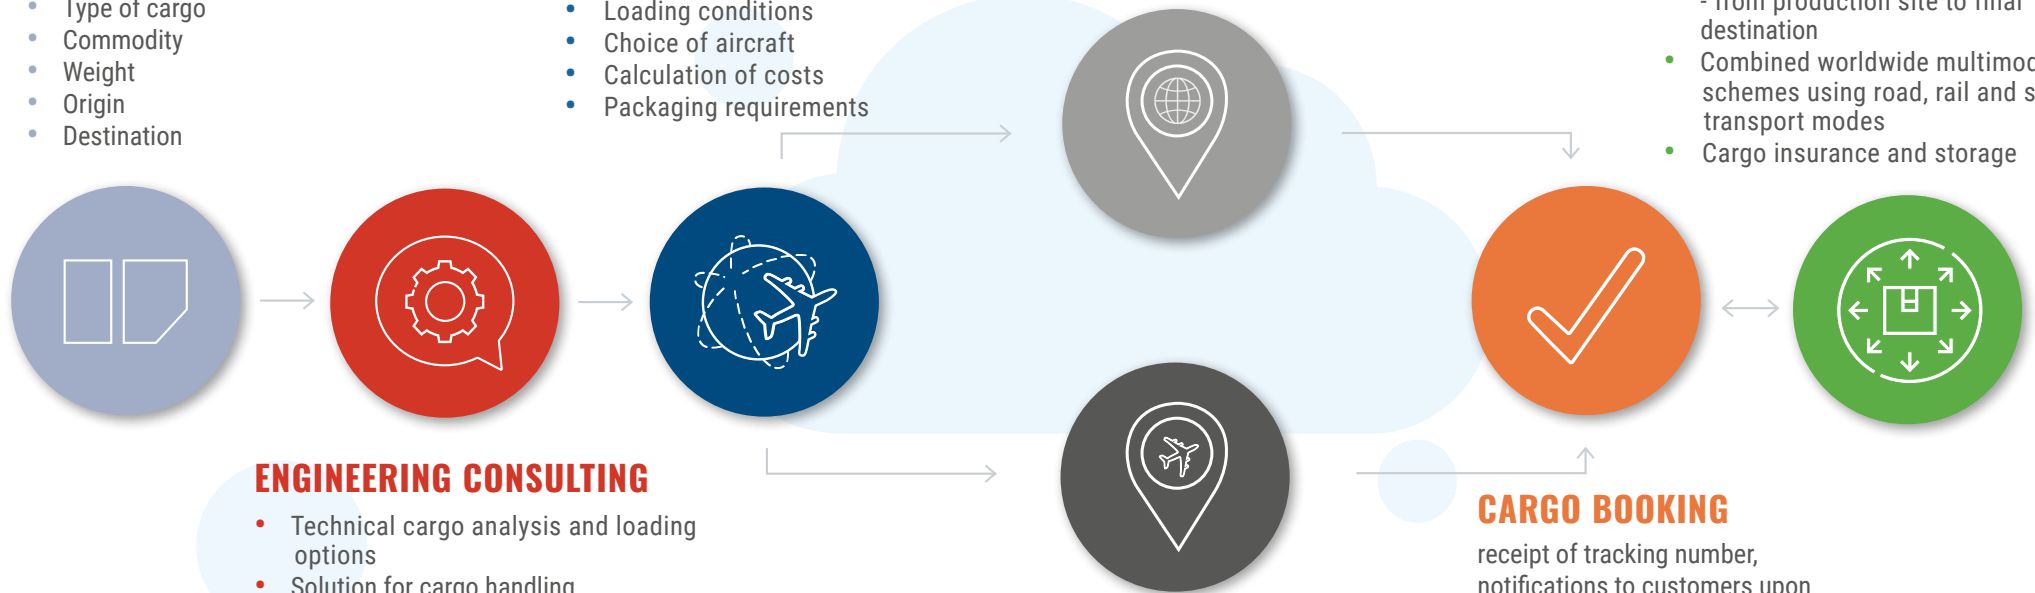

- Technical cargo analysis and loading options
- Solution for cargo handling
- Solution for fast and safe on/offloading
- Design and manufacture of special loading equipment
- Load planning using 3D simulation

CHARTER CARGO OPERATION

- Payload equals freighter's capacity
- Route is outside scheduled carriers' network
- Airports of origin and destination lack some cargo handling equipment
- Cargo is outsized or super heavy to transport on board B747, B777 or B737 freighters
- Design and manufacture of special frames to enable loading and transportation of cargo

CARGO BOOKING

receipt of tracking number, notifications to customers upon cargo movements

ONLINE *booking*

For your convenience we have launched **online booking service**. Book on our homepage or use the online booking platform of our partners.

Online booking for our advanced users who have been working with us for a long time and have an agreement in place

Online booking via cargo booking platform

Online booking via cargo booking platform
