We love
to make it happen.

abc | e-com®

for to-door delivery products

When virtual becomes reality

E-commerce is an emerging sector driven by ever-increasing demand for **cross-border purchases** and is led by customer expectations of receiving high-quality **'one-click' services** through online market places and platforms. We like improving your customer experience and aim to continuously develop our logistics solutions for **fast, seamless, and effective delivery of shipments** for this sector. Our global network coverage gives unlimited access to major e-commerce trade lanes. **Always. Worldwide.**

E-commerce to-door solution is based on our own IT development and guarantee 100% traceability of each and every shipment. ABC's IT team has created a sophisticated information field which integrates IT tools of all supply chain stakeholders with the possibility to obtain shipment movement records and statuses between various internal systems of all partners.

We gradually extend the boundaries of our services and our customers benefit from direct cooperation with us. **We take responsibility for airfreight, import customs clearance, and last mile delivery for B2C shipments transported to Russia.** By taking this responsibility we guarantee that our supply chain partners will follow and meet the highest quality standards set in aviation industry in general and in AirBridgeCargo in particular.

Responsible in everything we do
